Measurement Guide

1- Panel & 2- Panel Meshtec Ultimate Security Patio Screen Doors

Measure Rough Opening Height

Measure in 3 locations as shown. Use shortest measurement.

Measure Rough Opening Width

Measure in 3 locations, top, middle and bottom. Use shortest measurement.

Measure Active Screen door panel opening width

Measure from the mounting surface on the active patio door panel side to the edge of the inactive patio door panel.

2- Panel Meshtec Ultimate Security Patio Screen Doors

Determine which fit range your measurements fall within and order that standard size door.

If custom size is required record measurements below.

Door Size	Standard Size Rough Opening Width Fit Range	Standard Size Rough Opening Height Fit Range
72" x 80"	70 1/4" 73"	79 3/4" 82 1/2"

Measure from the inside top edge to existing sliding patio door track.

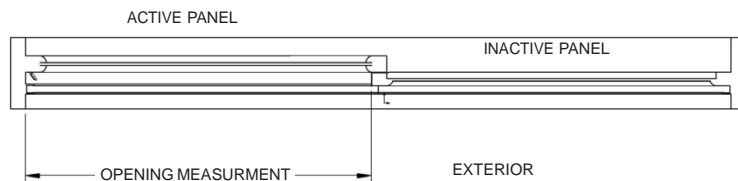

Rough Opening Height

Measure from the inside edge to the inside edge of existing patio door

Rough Opening Width

Measure active screen door panel opening width (custom only)

Active Panel Width

1- Panel Meshtec Ultimate Security Patio Screen Doors

Measure from top mounting surface to bottom mounting surface

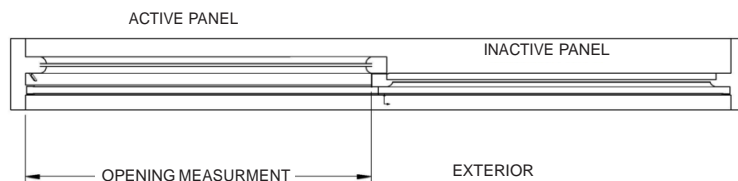

Rough Opening Height

Measure from the inside edge of the mounting surface to the opposite inside edge of the mounting surface

Rough Opening Width

Measure active screen door panel opening width

Active Panel Width

Heavy-duty Patio Screen Door

Measure from the surface of the side pocket where the patio screen door will latch to the far edge of the verticle stile of the main patio door stationary glass panel

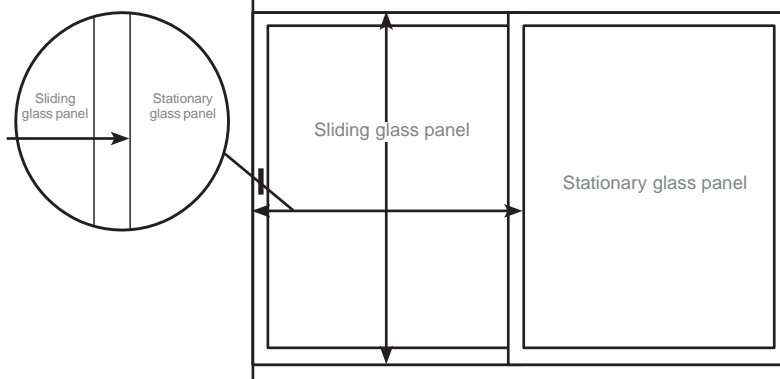

Opening Width

Determine Track Type

A. Center Channel - Measure from inside top pocket to center rail at bottom of sliding screen door track

B. Center Rail - Measure tip-to-tip of center rail at top and bottom of sliding screen door track

Opening Height

Outside view looking in
