### ECONOMY STEEL SECURITY DOORS

This section includes photographs and specifications of line of economy steel security doors. Although these products are not manufactured at our Redlands, CA facility, all items are welded, assembled and finished using high quality raw materials and are designed and priced to allow your customers the option of purchasing a reasonable quality, reasonably priced door.

For applications where finish, special options and custom features are critical, please go to section 2 of this catalog where our made to order domestic steel security doors are shown.

Our economy line of steel security doors have a 90 day limited warranty against functional manufacturing defects only. Cosmetic defects do affect the applications and uses for which this door is designed. Due to these doors being a lower cost option to our domestic line of steel security doors, we cannot accept any returns or credits for cosmetic issues.

Only the standard sizes and colors shown are available on the economy line of steel security doors.

#### Standard “net” frame sizes

Standard “net” sizes shown indicate the typical “call-out” size plus the outside mounting frame. Please keep these dimensions in mind when ordering. If a standard sized door will not fit the opening measurements, please go to section 2, where “custom” sized product may be ordered.

- steel security doors come as **surface mount**.

The **standard sizes** indicated in this section represent “industry standard” door openings.
